Trek 820 Tail Light Mounting Bracket Replacement

We will show you how to install a tail light mounting bracket to your bicycle.

Written By: Kaveh Karimiyanha

PARTS:

- Tail Light Mounting Bracket (1)

Step 1 — Tail Light Mounting Bracket

- Obtain one tail light mounting bracket and one screw as shown in the picture.
- The screw should be removed from the mounting bracket.

Step 2

- Clean the bicycle seat post and mounting bracket.
- Wrap the mounting bracket strap around the seat post.
- Verify the larger piece rests towards the tail end aligned with the tires.
- Verify the bracket's screw hole is on the right side of the bicycle.

Step 3

- Locate the slot on the bracket where the strap will be inserted.
- Insert the strap into the slot.
- Tighten the strap just enough to keep the bracket in place.

Step 4

- Insert the screw into the bracket screw hole.
- Tighten the screw with fingers until the mounting bracket rests freely on seat post.

To reassemble your device, follow these instructions in reverse order.
